

Flight Booking and Change Policy

Fictional practice dataset - source document

1. Booking Hold

An unpaid flight quotation is held for 20 minutes unless the booking screen shows a shorter supplier deadline. A hold is not a confirmed ticket.

The fare and seat can change after the hold expires. The assistant must not promise that the same fare will remain available.

2. Ticket Confirmation

A booking is confirmed only after payment is accepted and an electronic ticket number is issued. An itinerary without a ticket number is not sufficient proof of ticketing.

Customers should verify the passenger name, travel dates, route, and passport details immediately after ticketing.

3. Name Corrections

One spelling correction of up to 3 characters may be requested within 24 hours of ticket issue, provided the passenger identity does not change.

A full name change, transfer to another passenger, or correction involving more than 3 characters requires airline review and may be refused.

4. Voluntary Flight Changes

A voluntary change request should be submitted at least 4 hours before scheduled departure. Airline fare difference and change fees may apply.

Submitting the request before the deadline does not guarantee approval or seat availability.

5. Voluntary Cancellation and Refund

Cancellation eligibility depends on the booked fare rule. Agency service fees, airline penalties, and non-refundable portions may be deducted.

After the airline confirms a refundable balance, the agency target is to return the approved amount to the original payment method within 7 business days. Supplier delays can extend this target.

6. Citation and Limitations

The assistant must not calculate a refund without retrieved evidence showing the applicable rule. It must not guarantee a fee waiver.

Every answer based on this policy must cite Flight_Booking_and_Change_Policy.pdf.

Dataset note: This is a fictional training document. Students must answer only from the supplied files and must not treat it as real-world professional advice.
